IPMDAR Desktop Tool Download Instructions

QUICK DOWNLOAD INSTRUCTIONS

1. Download the ZIP file containing the tool from the website

2. Extract the contents of the ZIP file using the password: EVM TOOL

3. Run the tool by double-clicking the extracted application file

If you have trouble accessing the tool with the above steps, see detailed instructions below.

DETAILED DOWNLOAD INSTRUCTIONS

1. Install Microsoft .NET Framework version 4.6 or later. The IPMDAR tools require .NET Framework version 4.6 or later. This is included in Windows 10, but may not be included in earlier versions of Windows. In this case, please contact your I.T. support staff for help with installation.

2. Download the ZIP file containing the tool from the website. For example:

    a. Click the link to download the ZIP file containing the tool from the website

    b. Create a folder on your desktop with the name of the tool

    c. Move the downloaded ZIP file from where it was saved to the newly created folder

3. Extract the contents of the ZIP file using the password: EVM TOOL. This will require a third-party utility that supports extracting ZIP files with encrypted content, such as the free utility 7-Zip. For example:

    a. Right click on the downloaded ZIP file and choose 7-Zip > Extract Here

    b. Enter the password: EVM TOOL

4. Run the tool by double-clicking the extracted application file. This is the file whose type is listed as Application in the File Explorer window when using the Details view.

Contact the EVM-CR Help Desk at EVM-CRsupport@Tecolote.com if you require assistance.
